

Amendments to the Claims:

1-10. (Canceled)

11. (Currently Amended) ~~Apparatus~~ An apparatus for detecting the location of electrical activity in the wall of a human bladder, comprising:

a detector adapted to be introduced into the bladder via the urethra, and having a connector to the exterior; and

a filling lumen adapted to permit passage of a sterile fluid from the exterior through an open end of the filling lumen into the bladder for distending the bladder.

12. (Currently Amended) ~~Apparatus~~ An apparatus according to claim 11 ~~and comprising wherein the detector comprises~~ an expandable device adapted for passage through the urethra in a collapsed condition and reversibly expandable when in the bladder.

13. (Currently Amended) ~~Apparatus~~ The apparatus according to claim 12 wherein said expandable device has a plurality of detection sites thereon.

14. (Currently Amended) ~~Apparatus~~ The apparatus according to claim 13 wherein said detection sites are uniformly distributed on the surface thereof.

15. (Currently Amended) ~~Apparatus~~ The apparatus according to claim 14 wherein said expandable device resembles a sphere in the expanded state[[[,]]].

16. (Currently Amended) ~~Apparatus~~ The apparatus according to claim 14 wherein said expandable device comprises a cage having a plurality of arcuate arms extending between opposite poles.

17. (Currently Amended) ~~Apparatus~~ The apparatus according to claim 12 and including an external telescopic connector whereby relative telescoping movement causes the device to expand and contract on demand.

18. (Currently Amended) ~~Apparatus~~ The apparatus according to claim 12 and ~~comprising wherein the expandable device comprises an inflatable device.~~

19. (Currently Amended) ~~Apparatus~~ The apparatus according to claim 18 wherein said device includes an inflation lumen for inflating the inflatable device, the inflation lumen having an external closure.

20. (Canceled)

21. (Currently Amended) ~~Apparatus~~ The apparatus according to claim-~~20~~ 11 and comprising multiple lumens.

22. (Currently Amended) ~~Apparatus~~ The apparatus according to claim 11 and comprising an array of detection sites on the detector adapted to detect electrical activity in the wall of the bladder whereby the location of said electrical activity can be determined.

23. (Currently Amended) ~~Apparatus~~ The apparatus according to claim 22 wherein said detection sites are uniformly distributed.

24. (Currently Amended) ~~Apparatus~~ The apparatus according to claim 12 and further comprising orientation means whereby the orientation of ~~an~~ the expandable device in the bladder may be determined from outside the bladder.

25. (Currently Amended) ~~Apparatus~~ The apparatus according to claim 12 and further including a lumen adapted to receive a stiff curved guide member for steering of the expandable device.

26. (Currently Amended) ~~Apparatus~~ The apparatus according to claim 11 and further including an ablation tool adapted for insertion through the urethra and operable to ablate the internal surface of the bladder wall.

27. (Currently Amended) ~~Apparatus~~ The apparatus according to claim 26 wherein the tip of said tool is detectable by a position sensing apparatus.

Appl. No.: 10/596,934
Amdt. dated February 21, 2008
Reply to Office Action of December 11, 2007

28. (Currently Amended) ~~Apparatus~~ The apparatus according to claim 27 wherein the tip of said tool is adapted to be electrically active and wherein said apparatus is adapted to detect said activity.
